REVENUE MODEL (revenue model) is a business model that focuses on generating revenue through the sale of products or services. It is a common model for many businesses, including retail, manufacturing, and service industries. The revenue model is a key component of a company's overall business strategy and is used to determine the pricing and profitability of the company's offerings.

Kenneth and Jane Laudon (2010), define radio frequency identification as “technology using tiny tags with embedded microchips containing data about an item and its location to transmit short-distance radio signals to special RFID readers that then pass the data on to a computer for processing” (Laudon & Laudon, 2010, p. 279). RFID tags do not require line of sight contact to be read ...
