Oxygen, a colorless, odorless, tasteless gas essential to living organisms, being taken up by animals, which convert it to carbon dioxide; plants, in turn, utilize carbon dioxide as a source of carbon and return the oxygen to the atmosphere. Oxygen forms compounds by reaction with practically any other element.

[Concordance - Encyclopedia of The Bible - Bible Gateway](#)

Pessimism, an attitude of hopelessness toward life and toward existence, coupled with a vague general opinion that pain and evil predominate in the world. It is the antithesis of optimism, an attitude of general hopefulness, coupled with the view that there is a balance of good and pleasure in the world.

PREPARATION OF FOOD PREPARATION OF FOOD. Food preparation has been a constant chore since the first human beings picked up cutting and mashing stones. In return, this effort to make food edible, preserve it, and transform its character has sustained an ever-increasing population. Many techniques, including grinding, sifting, drying, salting, sealing, fermenting, and applying heat, are ...
